**Do you want to study nursing in Finland** and fulfil your educational dream to practise a profession that provides you with patients facing as well as with independent and versatile career possibilities? Come to study with us at Savonia University of Applied Sciences in Finland!

### **The Nursing Programme aims at developing competent and highly skilled registered nurses**

with an excellent knowledge of encountering, supervising, and caring for people with diverse health issues. Our programme offers a multiprofessional learning environment in modern facilities with **a simulation centre, clinical skill laboratories, and health technology.** The studies are implemented in a blended manner combining personal tutoring, e-learning, and clinical nursing practises aimed at deepening your multiprofessional evidence-based care.

**Today, nursing is one of the most esteemed professions** among Finns. Highly educated nursing professionals perform independent and responsible work based on nursing science as well as on EU directives and requirements.

■ **Our basic studies** include entrepreneurship and innovation, research studies, language studies, basic courses in health and social studies, clienthood in the field of health and social service, and health promotion and well-being.

■ **Our professional studies** include evidence-based nursing, health promotion, clinical nursing, family-oriented nursing, and multiprofessional nursing.
