

A photograph of three students in a workshop or laboratory setting. A female student in the foreground, wearing safety glasses and a black shirt, points at a large monitor. Behind her, a male student in a tan lab coat and safety glasses looks on. To the right, another female student with blonde hair, wearing safety glasses and a brown sweater, holds a piece of paper. The background shows workshop equipment and a blue wall.

BACHELOR OF ENGINEERING, INDUSTRIAL MANAGEMENT

The Industrial Management programme develops highly skilled technology industry experts who also focus on service-oriented business and production in industrial framework.

The duties of an industrial management graduate fall within the fields of industrial engineering and business management. For example, supply chain management, project management, business operations, sales engineering, and other industrial-related activities. Graduates understand product-orientated and service-oriented business models and have the knowledge and skill to design new products and services, based on the customers' needs.

Besides traditional engineering skills, Industrial Management students study Internet of Things (IoT). Graduating engineers are also familiar with environmental issues and Circular Economy (CE) and are able to consider these issues in decision-making. Students can also choose energy engineering courses in their curriculum and thus deepen their knowledge of sustainable energy technologies and industry.

Duration:
240 ECTS, 4 years

Language:
English

Study mode:
Full-time studies, on Campus

Annual intake:
40

Study place:
Varkaus Campus,
Varkaus, Finland

LIFE IN FINLAND

Finland is one of the safest countries in the world. The culture is non-hierarchical, so you can e.g. address your teachers by their first names.

Finland is located in the north and in the zone where southern and polar air masses meet. Savonia UAS lies in the heart of Eastern Finland where you can really experience the four seasons. Here the summers are warm and full of light, and winters are cold and dark.

Luckily the Finns are warm at heart, especially when you get under their silent appearances.

TUITION FEES

Savonia UAS is obliged to charge tuition fees for those students who are not citizens of countries of the European Union (EU) or the European Economic Area (EEA). The legislation concerns degree programmes conducted in English.

The tuition fee is charged for each academic year, and it must be paid by the set date.

For those Bachelor students, who start their studies after 1 January 2025, the tuition fee is 9700 euros per academic year.
